EasyRest – Comprehensive restaurant management application
Developed with Flutter and PostgreSQL, multi-platform (Web, Android, iOS).
Currently expanding with a web dashboard in Angular for remote management.
Bookworm – Library management application
Features OCR integration and connectivity with Google Vision API and Google Books API.
Miroit+ Expert - Flutter app + Django Backend - Full Commercial Management and Team Management for Mirrors & carpenters

JÉRÔME TREBOUCLET

APPLICATION DESIGNER & DEVELOPER

PROFILE

Application Designer and Developer trained at Icadémie Toulon, specialized in Kotlin, Flutter, React.js, Python, and SQL.
With over 30 years of experience as a restaurant manager, I bring a unique combination of organizational, management, and customer service expertise, now applied to the creation of efficient, user-centered software solutions tailored to business needs.

PROFESSIONAL EXPERIENCE

Developer Unity - Gameplay &IA

2025 - 2026 Pillow Interactive

- Developed a 3D naval combat game in Unity, focusing on gameplay systems and interactive environments.
- Designed an autonomous enemy crew AI handling dynamic task prioritization (combat, fire extinguishing, repairs) using C#.

Freelance Developer

2024-2025

- Design and development of modern, multi-platform applications (mobile, web, desktop) using Flutter, Angular, Kotlin, and PostgreSQL.
- Creation of complete technical architectures: database modeling, REST API integration, and user interface design.

Restaurant Manager

2006 - 2024

- Oversaw daily operations and managed teams of up to 20 employees.
- Implemented optimized processes for organization, cost control, and customer satisfaction.

Strong adaptability and problem-solving skills in dynamic environments.

IT Technician

ELAN IT, Belgique - 2005

- Maintained IT systems across Belgian banks.
- Network administration and support for large infrastructures.

Workshop Manager (Apple/PC)

Accropom et Iconcept - 2000-2004

- Hardware maintenance and network installations.
- Managed IT infrastructure for corporate clients.
- Administered Active Directory and Exchange environments.
